## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Mori et al. (US Patent No. 5,513,206) is considered the closest prior art. Mori teaches an apparatus for preheating/charging scrap in which material is dropped from a hopper through a vertical shaft onto the shaft floor. Mori also teaches a pusher with a bottom surface resting on the shaft floor which pushes the stock into the melting vessel. Mori does not teach that the pusher is pivotally mounted on the actuator or that the pusher has lateral surfaces that converge from the top surface to the bottom surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
